Bill,

At this time, our goal is understanding the situation in Dimock and evaluating additional options, including further sampling. No decision has been made by EPA to provide alternate sources of water.

Subject: Dimock water

Terri:

What can you tell me about EPA’s decision regarding the water supply in Dimock, PA?

Is EPA looking into possible contamination of water in Dimock?
Will EPA be doing some more sampling there? When?
Is there new evidence provided by residents that suggests that drinking water could be more polluted than originally thought?
Have some residents said fracking polluted the water? Does EPA agree?
Has study swayed EPA's outlook on fracking rule?
